SUMMARY

Senior Frontend Software Engineer with 7+ years of experience building customer-facing web applications (React, Vue, TypeScript) for products serving 100K+ daily active users. Track record of shipping features and controlled experiments that move core engagement and adoption metrics, including a 25% lift in user engagement and a 20% increase in mobile traffic, through close partnership with Product and cross-functional teams.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, Vue, AngularJS, HTML5, CSS3
- **Backend:** PHP, MySQL, RESTful APIs, Docker, GraphQL
- **Architecture & Concepts:** Microfrontends (single-spa) - SPA, Performance Optimization, Responsive Design, Web Accessibility (WCAG), Feature Flagging & Controlled Experimentation
- **Testing:** React Testing Library, Jest, TestCafe (end-to-end testing)
- **Tools/Other:** Webpack, Babel, Gulp, NPM, PNPM, Yarn, Storybook, Git, GitHub, Bitbucket, JIRA
- **Operating Systems:** Windows, macOS

WORK EXPERIENCE

Achievers, Toronto, ON

Jan 2021 – Present

Senior Software Engineer

Mar 2025 – Present

Intermediate Software Engineer

Mar 2022 – Mar 2025

Software Engineer

Jan 2021 – Mar 2022

- Drove the implementation of new features for the platform, boosting user engagement by 25% and influencing over 100K daily active users
- Built scalable UI components using Storybook, enabling other teams to streamline their development process and reduce build time by 15%
- Implemented GraphQL queries and mutations, improving data retrieval efficiency and cutting API response time by 30%
- Mentored and onboarded five junior developers, helping them contribute to production code within the first three months
- Collaborated with cross-functional teams in an Agile environment, consistently delivering high-quality software on time

Frontend Software Engineer | Engage People Inc, Markham, ON

July 2019 – Jan 2021

- Led the frontend development for major features using AngularJS, Vue, and TypeScript, directly contributing to a 20% increase in mobile traffic through a mobile-first, responsive approach
- Played a key role in strengthening frontend design and architecture, reducing technical debt, and improving code quality
- Conducted code reviews and engaged in architecture discussions to improve frontend efficiency and scalability
- Partnered with stakeholders to design and develop new features, enhancing customer experience and increasing platform adoption

EDUCATION

Bachelor of Science, Computer Science | Ryerson University (TMU)

Sep 2012 – June 2016

Minor in Mathematics

PROJECTS

Hackathon 2022 | Achievers

July 2022

- Developed the UI for a celebration feature using React, leading a team to achieve first place out of 30+ teams in the 'Spirit of Hackathon' category, with a focus on scalability and component reusability for long-term viability
